

DOSU-T

Pre-engineered self-contained chemical dosing system with inbuilt tank fully bunded to AS standards.

Features :

- Available with a range of pumps and tank sizes
- Rugged bunded skid suitable for forklifting
- PE chemical tank
- LMI metering pumps from the Australian Market Range to accommodate a wide range of chemicals and metering capacities
- PVC-U Schedule 80 piping system comprising pulsation dampener, calibration column, pressure gauge, y-strainer, isolation valves, pressure relief and pressure sustaining valves
- Dosing system mounted on HDPE backboard

Options :

- Fully enclosed dosing panel with self-closing doors
- Alternative piping and valve materials are available

Model shown above for enclosed panel design option "EP"

Order Code **DOSU - T - 0500 - 30C3 - AV / JB / SH**

Base Model and Tank Size	
Code	Tank Size
DOSU-T-0200	200 L
DOSU-T-0500	500 L
DOSU-T-1000	1000 L
DOSU-T-2000	2000 L

On Skid Pump Code
Refer to Dosing Equipment Catalogue

Additional Features	
Code	Description
EP-1	Enclosed dosing panel (indoor)
EP-2	Enclosed dosing panel (outdoor)
AV	Automatic isolation valves
JB	Instruments wired to junction box
LT	Ultrasonic tank level indicator
PT	Pressure transmitter in discharge
SH	Sodium hypochlorite specification (ventilated ball valves, degassing lines, vent fan)

Dimensions

Approximate dimensions L x W x H (mm)

DOSU-T-0200	1200 x 1200 x 1050
DOSU-T-0500	1200 X 1200 X 1170
DOSU-T-1000	2400 X 1200 X 1940
DOSU-T-2000	2400 X 1200 X 2170
